

Disability Insurance(DI) claim prediction (State of California)

Name : Ramya Dhabade

Email : rd08289n@pace.edu

GitHub : <https://github.com/U174749/Capstone-Project-2023>

Question : Can one predict how many claims will be filed in the coming year based on the historical data so that a state department can allocate a certain amount in its budget?

Can one predict the assigned funds will be sufficient if we increase the weekly benefit amount?

Dataset : <https://data.ca.gov/dataset/disability-insurance-di-monthly-data>

Motivation : This project will help me in working with real world problems and solve them using the knowledge gained through the master's program.
